# Coin/Bill Acceptor - CBA

OVERVIEW

The EnvisionWare Coin/Bill Acceptor (CBA) is a versatile, *universal* coin-op that accepts bills/notes and coins for copy and print payment. What sets this system apart is its ability to simultaneously control copy functions while interfacing to a Print Release Terminal, Fine Payment Client, EnvisionWare Self-check, or AAM User Account Manager. Most coin-ops are designed to EITHER control a copier or provide print control but not both.

The universal dual functionality saves you money because you can use a single coin-op to perform two functions. Further, a dual purpose unit saves valuable floor space. Mount the system on the included non-tip stand, bolt to the wall, or use the Copier Security Housing which also controls access to the paper drawers.

The CBA is supplied with a standard serial or USB cable to interface to your Print Release Terminal or EnvisionWare kiosk (Launch Command Kiosk Edition). An optional cable provides the customized interface for your specific copier so that you can control copy functions.

Built for a global market, the CBA can be ordered for the following currencies: US, Australia, Canada, Euro, Pound Sterling, Hong Kong, Brazil, Mexico, and others. Power supplies are shipped appropriate to the destination address.

FEATURES
- Provides change
- External serial port
- Multiple prices
- Electronic meters
- Includes serial or USB cable
- ADA Height
- Stand included
- Freight included
- 1 year warranty
- Next day parts
- Optional copier cable

PHYSICAL
36"H x 12" W x 18" D(at base). 60 lbs.
